

EnviroServe Chemicals, Inc.

***Your Single Source
Sanitation Chemical Supplier for
Federally Inspected
Meat, Poultry, and Egg Plants***

We know what it takes:

Products, Service, Support and Equipment

EnviroServe Chemicals:

Qualified to be your Sanitation Chemical Supplier!

Since 1996, ***EnviroServe Chemicals*** has been providing the meat, poultry and egg industry with many specialty sanitation type chemicals. Our specialty chemicals are used for cleaning, sanitizing, and many other specialized applications. While our products are helping our customers accomplish Pathogen Reduction, we assist them in managing their Hazard Analysis and Critical Control Point (HACCP) and their written Sanitation Standard Operating Procedures (SSOPs).

EnviroServe Chemicals' product line is very comprehensive and broad. Our line of products are accepted for a specific use in state and federally inspected meat, poultry and egg plants.

EnviroServe Chemicals offers everything from cleaners, sanitizers, product washes and rendering agents to water treatment chemicals. All of our products are produced under stringent quality standards and GMP rules. Many ***EnviroServe Chemicals*** formulations are EPA (Environmental Protection Agency) registered and all of them meet and/or comply with USDA, NMFS and FDA requirements.

Food safety is no doubt, the most important issue in the food industry. As a leader in the food industry, ***EnviroServe Chemicals*** continues to work conscientiously to develop new, safer and more effective products. Our goal is to provide our customers with the chemicals they need to keep their plants clean, sanitary and safe. We at ***EnviroServe Chemicals*** take this responsibility very seriously.

In addition to our biologist and chemists, ***EnviroServe Chemicals*** has trained and experienced Technical Service Representatives. They provide our customers with comprehensive in-plant consultation in all areas of sanitation, chemical product usage and custom equipment acquisitions. This also includes training our customer's employee in sanitation procedures and the safe use of chemicals.

To insure that the best possible levels of chemicals are being used for their correct purpose and approved ratios, ***EnviroServe Chemicals*** uses the best chemical dispensing equipment that can be found. All of our products and equipment come with an ***EnviroServe Chemicals*** guarantee.

Even though our products are not used as food additives, we strive to produce them under GREEN and GRAS standards, when applicable.

EnviroServe Chemicals'

Product Line

Chlorinated Cleaners

Self Foaming Alkaline Chlorinated Cleaners
Non-Foaming Alkaline Chlorinated Cleaners

Non-Chlorinated Alkaline Cleaners

Self Foaming Alkaline Cleaners
Non-Foaming Alkaline Cleaners
